

EXPERIMENTS 5

The image shows a C++ IDE with a project named 'ex 5.cpp'. The code implements a process scheduling algorithm. The output window displays the program's execution, including user input for process details and the resulting scheduling metrics.

```
79     total += process[i].waiting_time;
80 }
81
82 average_waiting_time =
83     (float)total / number_of_process;
84
85 total_turnaround = 0;
86
87 printf("\n\nProcess Name\tBurst Time\tWaiting Time\tTurnaround Time\n");
88
89 for (int i = 0; i < number_of_process; i++)
90 {
91     process[i].turn_around_time =
92         process[i].burst_time + process[i].waiting_time;
93     total_turnaround += process[i].turn_around_time;
94
95     printf("%c\t\t%d\t\t%d\t\t%d\n",
96           process[i].process_name,
97           process[i].burst_time,
98           process[i].waiting_time,
99           process[i].turn_around_time);
100 }
101
102 average_turnaround_time =
103     (float)total_turnaround / number_of_process;
104
105 printf("\n\nAverage Waiting Time: %.2f", average_waiting_time);
106 printf("\n\nAverage Turnaround Time: %.2f\n",
107        average_turnaround_time);
108
109 return 0;
110 }
```

Compilation results...

- Errors: 0
- Warnings: 0
- Output Filename: C:\Users\priyanka.s\OneDrive\Desktop\OS\experiments\ex 5.exe
- Output Size: 130.7705078125 KiB
- Compilation Time: 0.31s

Process Name Burst Time Waiting Time Turnaround Time

Process Name	Burst Time	Waiting Time	Turnaround Time
A	5	0	5
B	5	5	10
C	3	10	13

Average Waiting Time: 5.00
Average Turnaround Time: 9.33

Process exited after 9.494 seconds with return value 0
